Xit Group Quick Release Dual Shoulder Camera Neck Strap

By Press Release • Posted: Jun 21, 2013

The Xit Group has introduced a new Quick Release Dual Shoulder Camera Neck Strap, dubbed the ultimate solution for two camera shooters. It is light weight at only 0.84 lbs., and small with a widening shoulder construction which reduces the burden. The strap is ergonomically designed and the weight is evenly distributed by way of the shoulder pads. The Dual shoulder Strap uses Velcro and fasteners as connections to facilitate dismantling, and it can easily be divided into two separate camera straps. The lock parts and connections are made of metal to hold up to rigorous usage. There's an adjustment device in the front of the strap designed to facilitate rapid adjustment of strap length. There are two tripod quick release plates with 1/4" threads for connecting the camera to any device with 1/4" screw. There is no need to remove the plate when mounting on a tripod.

TWO CAMERA RIG▲

By Press Release • Posted: August, 2013

For wildlife photographers who often have two cameras strapped to their bodies, the **Xit Group** has created the **Quick Release Dual Shoulder Camera Neck Strap** to make toting around two cameras more comfortable and convenient. The strap is ergonomically designed to distribute weight evenly through the widening shoulder pads. The strap uses Velcro, and metal lock fasteners, allowing quick adjustment of strap length while standing up to rigorous usage. Included are two quick-release plates with 1/4" thread for connecting the camera to a device with a 1/4" screw. The Dual Shoulder Strap can be divided into two separate camera straps for use individually. Estimated Street Price: \$29.00
